

Ready-For-Surgery™ Solutions

MTP Fusion Plate

The MTP Fusion Plate is a low profile neutralization plate designed to best fit the unique anatomical requirements of the metatarsal phalangeal joint, while providing the stability needed for a predictable joint fusion.

System Features

- Robust plate design provides strength and durability
- Low profile construct
- Convergent and inline plate options
- Inline plate features 5 degrees of dorsiflexion
- Convergent plate screw trajectories provide secure fixation

Ordering Information

MTP Plates (Convergent)

Product #	Configuration	Holes
MFP 401	Left	6
MFP 402	Right	6

MTP Plates (Inline)

Product #	Configuration	Holes
MFP 011	Right	5
MFP 012	Left	5
MFP 211	Right	5
MFP 212	Left	5

BUILDING A MORE EFFICIENT CASE

Conventus-Flower Orthopedics is the leader in Ready-For-Surgery™ bone fixation. The FlowerCube™ produces clinically equivalent outcomes while generating cost savings and surgical efficiencies when compared to traditional orthopedic implant and instrument sets.

- **Innovative System that is pre-packaged and ready for use**
- **Contains single-use, sterile packaged implants & instruments required for specific surgical indications**
- **Eliminates pre-op handling and post-op reprocessing**

FlowerCube™ Surgical Efficiency Study Results¹:

Faster Case Time

Time saving of nearly 20 minutes per case with the FlowerCube compared to procedures using traditional implants

3rd Party Reimbursement Savings

Over \$1,300 savings in third party reimbursement costs for procedures performed at an ASC compared to those done in an outpatient hospital setting

Joint Union

84.51% of study patients experienced union of the joints by 8 weeks post-surgery and 98.59% by 12 weeks post-surgery

Opportunity Savings

Sterilization, reprocessing and packaging of surgical trays would add \$45 per instrument tray

¹: Data on file at Flower Orthopedics

- IRB approved, prospective, multi-center clinical trial • Evaluating arthodesis of first MPJ • 71 patients at both hospital and ASC locations
- Primary Outcome Measure - Fusion rate 12 weeks post surgery • Secondary Outcome Measure - Cost & Time Efficiency
